

**Efficiency.
Flexibility.
Reliability.**

You can feel it in the air.

LG DOAS maximizes indoor air quality and comfort.

When you choose LG Dedicated Outdoor Air Systems, you're getting the promise of quality and complete peace of mind. Whether you're providing comfort for offices, schools, hospitality, healthcare, or multi-family projects, LG DOAS units are your preferred choice.

Energy Efficient

LG is the only manufacturer with a double heat recovery coil which reduces the compressor load, uses less energy and saves money.

Easy Installs & Control

LG DOAS has built-in Heat Recovery Units which require less labor to install, and the controls are accessible remotely offering convenient management when you are on the go.

Cost Effective

The LG inverter compressor and double heat recovery coil effectively and vertically align VRF equipment, DOAS units, and controls in the building.

Flexible

The Indoor split and Rooftop split DOAS units are designed specifically for use with LG Multi V outdoor units and integrate seamlessly with LG VRF controls.

Eco-Friendly

LG DOAS units offer owners and designers an alternative to oil or gas and provide a solution where fossil fuel is not supported.
