

LG Multi V™ 5 Air Source

Expansive operating range

Provides all climate comfort with continuous heating performance in ambient conditions down to -22°F and cooling up to 122°F

Advanced Smart Load Control

Automatically adjusts system target pressures based on operating conditions to further improve efficiency

Intelligent Heating Technology

Works to minimize energy consumption for defrosting by preventing frost build up from happening

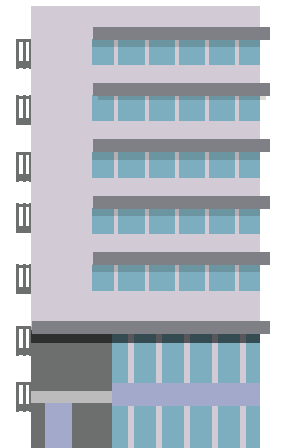

Biomimetic Fan Design

Efficient airflow with lower sound levels

You

When you go with LG Air Conditioning Technologies

Visit LGProComfort.com today and connect with an LG Account Rep to find out how the Multi V™ 5 will work in your next project.
